CAREER OBJECTIVE

Creative and technology-focused student skilled in front-end development, Power BI, and AI-based automation, with a strong interest in building smart and user-friendly digital solutions.

EDUCATION

Bachelor of Technology

V.S.B. Engineering College , Karur

2023 - Present

- Artificial Intelligence and Data Science - **CGPA - 8.05**

Higher Secondary Certificate

Cheran Matric Hr.Sec School , Punnam Chathiram

2022 - 2023

- Percentage - 90%

PROJECTS

AI Powered Heart Disease Risk Predictor | Python, Machine Learning, Flask, MySQL

- Developed an AI-driven healthcare web application that predicts heart disease risk using patient health parameters such as blood pressure, cholesterol, heart rate, and age through machine learning models.

AgriSense AI - Crop Monitoring Platform | Python, Machine Learning, React.js, MySQL

- Developed an AI-powered AgriTech platform that monitors crop health and soil conditions using IoT sensor simulation, providing real-time analysis of moisture, humidity, pH, and NPK levels through an interactive dashboard.

INTERNSHIP

- Completed **Infosys Springboard Virtual Internship 6.0** in Artificial Intelligence, gaining hands on experience in core AI concepts, machine learning techniques, and real-world problem solving. Successfully worked on practical assignments and industry-oriented learning modules, strengthening skills in AI, automation, and applied data-driven solutions.

SKILLS

Languages	Java , Python
Tools/Frameworks	React.js
Databases	MySQL, MongoDB
Other Skills	UI/UX Design , Frontend Development

CERTIFICATES

- Microsoft Azure SQL - Microsoft
- Machine Learning Foundation - Infosys Springboard
- Programming in Java - NPTEL

SOFT SKILLS

- Fast Learning Ability
- Team Collaboration
- Analytical Thinking
- Time Management
